

My name is Amy Myers and I am running for the Elm Ridge Water Control Improvement District Board of Directors. I am the current President of the Board of Directors and have served the communities of Savannah, Artesia and ArrowBrooke proudly for the last 9 years.

While in my current tenure on the Board of Directors I have repeatedly voted yes for the lowering of the tax rate, the increase in the over 65 tax exemption, the creation of and maintenance of our Elm Ridge Police Department, the development of the ArrowBrooke park, the upcoming Artesia water line, along with countless other projects. The Board and I have maintained an AA/A2 rating with our creditors and have kept a balanced budget that looks at the needs of all our communities to maintain freshwater, roads, wastewater, police, fire, and garbage service. It has always been my stance to serve the three communities by being a good steward of our tax dollars while maintaining our facilities and preparing for our district's future. I understand that as with any political office, my decisions, and those of the other board members, is for the betterment of the district I serve and not my own agenda.

I am the proud mom of a 20-year-old son Aiden and 17-year-old daughter Aurora. We have lived in Savannah for the last 15 years. We owned our first home in the Sea Pines area and after selling that home, we rented a home for two years and now have purchased that rental home. Both my children have attended Savannah Elementary, Navo Middle School and Braswell High School. We have loved living here in Savannah

and have been involved in Savannah, the surrounding community, and Elm Ridge WCID.

Currently I am working as the Administrative Services Manager for a private security company overseeing their Human Resources, Logistics, Travel Management, and general administrative duties. I work with hundreds off duty police officers, off duty firefighters and security professionals.

I have served as a board member for over 6 years on the PTA's of both Savannah Elementary and Navo Middle School. Being elected as president, vice president, and communications chair during that tenure. I have also served on the Denton Council of PTA's in a board position for 6 years including vice president and community relations co-chair. Recently I have been a member of the Braswell High School PTSA. I believe in education and find PTA a rewarding way to give assistance to those teachers and administrators who teach our students daily.

I have served on the Citizen's Bond Committee for Denton Independent School District for two bond cycles and chaired the oversight committee during that tenure. Working closely with district administration, contractors, and community members to ensure the successful growth of the school district and its facilities including the creation of Braswell High School. I have also sat on the 380-taskforce while on the Citizen's Bond Committee bringing community members together with local businesses regarding growth and changes along the 380 corridor.

Being a true believer in giving back, I have always believed it is important to serve the communities where you live and raise your family. A belief I have passed down to both my children. I am community minded, fiscally responsible and hold two bachelor's degrees and a master's degree. I would be honored to continue to serve Elm Ridge Water Control Improvement District for the next 4 years.
